## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-4 objected to because of the following informalities: In claim 1, "the area", "the sole of the foot", "its inner and outer sides" all lack proper antecedent basis. In claim 2, "the edge" and "the thickness" lack proper antecedent basis . Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 appears it should depend from claim 3 inasmuch as it is incomplete and lacks antecedent basis for several terms. Therefore, the scope of claim 4 is not clear.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4967492 (Rosen).

Rosen teaches a footwear (see figures 23-25) having structure as claimed including an elastomeric sole (200) having a plurality of longitudinal grooves

(204) on an inner and outer side of the sole forming a bellows-type structure, an upper (208), and an insole (218).

***Allowable Subject Matter***

5. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. **Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:**

**-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”**

**--“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”**

**-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06” MPEP 714.02. The “disclosure” includes the claims, the specification and the drawings.**
